Objective

Final-year B. Tech CSE student with hands-on experience in Machine Learning, Data Analysis, and AI-driven systems, seeking a SDE / AI-ML role to apply statistical modeling, Python, and ML techniques to real-world problems.

Education

- **Greater Noida Institute of Technology (GNIOT), India** 2022 - 2026
  CSE | CGPA:**7.7** (expected)
- **St. Mary's School, Kashipur, India** 2020 - 2021
  CBSE (Class XII), Aggregate: 78%
- **St. Mary's School, Kashipur, India** 2018 - 2019
  CBSE (Class X), Aggregate: 78%

Skills

- **Languages:** Python, SQL, Java
- **Data Science & ML:** Langgraph, Langchain Pandas, NumPy, Matplotlib, Scikit-learn, Statistics, Optuna, EDA
- **AI/ML Tools:** PyTorch, Jupyter Notebook
- **Backend & APIs:** Django,FastAPI
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Fast Learner

Experience

SDE-Intern, Moglix (Current Company) Mar'26-

- Developed and worked on Cerebra-chatbot used for creating PR's and RFQ in credlex.
- Developing Gen-AI applications and analysis software's.

AI Research Intern, Coding jr Jun'25-dec'25

- AI Research Internship: Researched Planto AI's architecture, features, and market positioning.
- Proposed improvements to user flow, model performance, and personalization.

Full-Stack Intern, Wayspire Apr'24–Jun'24

- Full Stack Web Development Internship: Completed a three-month internship with Wayspire.
- Collaborated with a team to build and debug full-stack modules, improving performance and user interface .

Projects

E-commerce Shopping System | Python, Django, Django REST Framework, MySQL, Postman

- Built REST APIs for product, cart, and order management with input validation and clean JSON responses.
- Implemented secure authentication and role-based access control using Django's built-in auth system.
- Designed normalized MySQL schema with ORM-based logic for stock updates and order calculations.

Real-Time Flight Delay Predictor | *Python, Scikit-learn, Streamlit, Pandas, AviationStack API*

- Developed a real-time prediction system to forecast flight delays across major Indian airports using a ML model.
- Built a data pipeline to collect and integrate live flight and weather data from external APIs for predictive analysis.
- Built an interactive Streamlit dashboard, display live flight statuses, and present delay predictions

Bug Detection and Fix Suggestion Tool | *VS Code API, TypeScript, FastAPI, Python, LLM, RAG, Vector-DB*

- Built an end-to-end AI system to analyze and assist in software bug detection using LLM-based RAG.
- Engineered a dual-mode system to automatically capture both static linting errors and runtime script exceptions.
- Designed a selectable UI with "Tutor" and "Debugger" modes to deliver tailored, AI-generated explanations or direct code fixes.

Academic and Extracurricular Achievements

- Maintained a top 15 academic rank in the department across multiple semesters.
- Awarded "Eloquent Speaker" for communication excellence
- Intel Unnati Program—AI/ML Track (2025): Completed a 2-month advanced tech program focused on AI/ML.
- Introduction to Cybersecurity—Cisco Networking Academy (2025)
- Deloitte Data Analytics Job Simulation - The Forage (2025)
- AWS Cloud Projects – Coursera Project Network (Dec 2024)
